

## Thursday, May 14th: Reaching Sustainability in the Existing Built Environment, Part II

Paul Eldrenkamp, Byggmeister, and Friends

We are delighted that we are able to follow our April forum with "Deep Energy Retrofits, Part II" -- a building science "slam", with contributions from several members of the sustainable building community.

The forum will feature detailed presentations of a variety of super-insulation strategies, including full-scale mock-ups of building assemblies, slide presentations of real-world projects, group critiques of the various strategies, and plenty of opportunities for questions and discussion.

Our April presenter, Paul Eldrenkamp, Byggmeister, will emcee; tentative guests are Jonathan Kantar, Sage Builders; Simon Hare, Place Tailor; Gregory Caplan, Living Structures; Cadour Pricejones, Byggmeister; and Carter Scott, Transformations.

Come see, listen to, and participate in an exchange of real world ideas on how we can reach true energy efficiency in our built environment.

---

### Location

The First Parish in Cambridge Unitarian  
Universalist 3 Church Street Harvard Square  
Cambridge, MA

### Time

Program begins at 7:30  
PM Doors open at 7:00 PM

---

Other News: The 2009 Eastern Massachusetts Junior Solar Sprint race will be held on Saturday, May 16th (rain date May 17th).

Volunteers are needed to help with registration, track set-up car repair, judging, and other tasks.

Please help make this a successful and rewarding day for all of the participants -- contact [info@basea.org](mailto:info@basea.org) to volunteer.

-- The April forum presentation, Deep Energy Retrofits, Part I, is now posted at the BASEA forum page.

-- The Tufts/BAC decathlon house ground-breaking was Earth Day 2009. Their new website: [www.livecurio.us](http://www.livecurio.us).

Remember, your donations help support BASEA, the Boston Area Solar Energy Association.
